

Marijn E. Dekkers
President and Chief Executive Officer
Thermo Fisher Scientific Inc.

Marijn E. Dekkers is President and CEO of Thermo Fisher Scientific Inc., the world leader in serving science. He orchestrated an industry-transforming merger in 2006 to create Thermo Fisher Scientific, a \$10.5 billion company that provides an unmatched portfolio of products and services primarily for researchers in the life sciences and healthcare industries.

Dekkers joined the company in 2000 as COO, and was named CEO in 2002. Previously, he held executive positions at Honeywell International, formerly AlliedSignal. Before that, he served in various operating roles within General Electric in both the United States and Europe after beginning his career as a research scientist within GE's corporate R&D center.

Dekkers received his doctorate and master's degrees in chemical engineering, and a bachelor's degree in chemistry, in his native country of the Netherlands. He serves on the boards of Biogen Idec, the Citi Performing Arts Center in Boston and the Massachusetts High Technology Council, and is a member of the Business Roundtable national association.
